

Easy to install and configure, SalesPad™ ShipTo increases accuracy & efficiency in your shipping operations.

SalesPad™ ShipTo gives users the ability to integrate UPS WorldShip™ and FedEx Ship Manager® with Microsoft Dynamics™ GP and SalesPad™. After shipping in UPS WorldShip™ or FedEx Ship Manager®, shipping information, freight amounts and tracking information are automatically written to the appropriate fields in the sales documents. Orders are then forwarded in the SalesPad Workflow and managed through the invoicing process.

The ShipTo Process

1. Sales orders are created in SalesPad or Dynamics™ GP
2. Orders are picked, packed and taken to your shipping system
3. The order number is keyed or scanned into your shipping system
4. ShipTo populates the shipping address and method
5. The package is weighed and labeled
6. The package's freight amount and tracking information are written to the appropriate fields in your Microsoft Dynamics™ GP company database
